## **Independent Verifier's Report on Performance Record**

DIVITAE

We have examined the accompanying Statement of Investment Performance and Notes to Statement of Investment Performance for the **ZEUS Trading Strategy** for the periods January 1, 2022 through March 31, 2026. DIVITAE is responsible for the Statement of Investment Performance and Notes to Statement of Investment Performance. Our responsibility is to express an opinion on this performance presentation based on our examination.

### **Scope of Work**

Our examination included examining evidence supporting the Statement of Investment Performance and Notes to Statement of Investment Performance for the **ZEUS Trading Strategy** and performing other procedures, as we considered necessary in the circumstances. Our examination included procedures to obtain assurance that performance results reflected in the Statement of Investment Performance were calculated using criteria as outlined in the Notes to Statement of Investment Performance. We believe our examination provides a reasonable basis for our opinion.

### **Opinion**

In our opinion, the Statements referred to above present, in all material respects, the performance record of the **ZEUS Trading Strategy** for the periods January 1, 2022 through March 31, 2026, based on the criteria set forth in the Notes to Statement of Investment Performance. The Statement of Investment Performance and Notes to Statement of Investment Performance are an integral part of this opinion.

## ***Notes to Statement of Investment Performance***

---

### **1. Investment Management**

DIVITAE provides access to systematic, algorithm-driven investment strategies across multiple asset classes, including forex, metals, crypto, and alternatives.

The firm focuses on quantitative risk management, portfolio diversification, and long-term capital preservation, combining proprietary algorithms with structured human oversight.

Strategies are designed to operate across varying market conditions with strict risk controls and transparent performance evaluation. DIVITAE is the trading name of the companies DKZ INFORMATION TECHNOLOGY SERVICES L.L.C and Stratinova LTD.

### **2. Strategy Description**

ZEUS is a state-of-the-art trading system that optimizes investment strategies through advanced correlation analysis, utilizing genetic algorithms, and ensembled filtering with ML. The system features an NSGA-II genetic algorithm-based allocation module.

The system dynamically allocates capital across 44 independent subsystems, trading FX and commodities. It finds optimal allocations based on risk-adjusted return metric such as Smart Sharpe and Sortino, as well as portfolio variance and advanced correlation data. It uses a proprietary scoring framework to evaluate subsystem performance, further focusing on diversification, and risk stability.

### **3. Calculation Methodology**

The performance returns of the Trading Strategy represent the results of actual trading. The returns have been prepared using the following methodologies consistently applied. Other methods may produce different results:

- Performance is calculated net of transaction costs and gross of management fees.
- Performance is calculated using the time weighted rate of return methodology. Monthly returns are geometrically linked to produce annual and year to date returns.
- Performance includes realized and unrealized gains and losses.
- Trade date accounting is used for calculation and valuation purposes.
- Securities are valued using broker values.

### **4. Other Notes**

- Past performance is not indicative of future performance.
- The Strategy uses complex instruments and comes with a high risk of losing money rapidly due to leverage.
- The Independent Verifier's Report on Performance Record and Statement of Investment Performance are an integral part of this presentation.
